### Ethylene and Vinyl Alcohol

EVAL™ is the Kuraray trademark for a plastic made from ethylene and vinyl alcohol.

EVAL's primary property is as a barrier

EVAL blocks oxygen, and is used as a packaging material for foods

EVAL blocks other gases as well. It is used in plastic storage containers and in the plastic automobile fuel tanks.

Manufacturing facilities:

Japan  
Belgium  
Texas

### Sequence of Events

**Wednesday, May 16 10:30**

Refrigerant opened to Reactor Coolers.

**Friday, May 18 15:00**

Reactor Pressure Test begins using ethylene gas.

**Friday, May 18 23:20**

Ethylene begins condensing.

Reactor begins cooling.

Reactor pressure still being raised.

**Saturday, May 19 07:00**

Low Reactor temperature noticed.

Refrigerant blocked, Reactor heated.

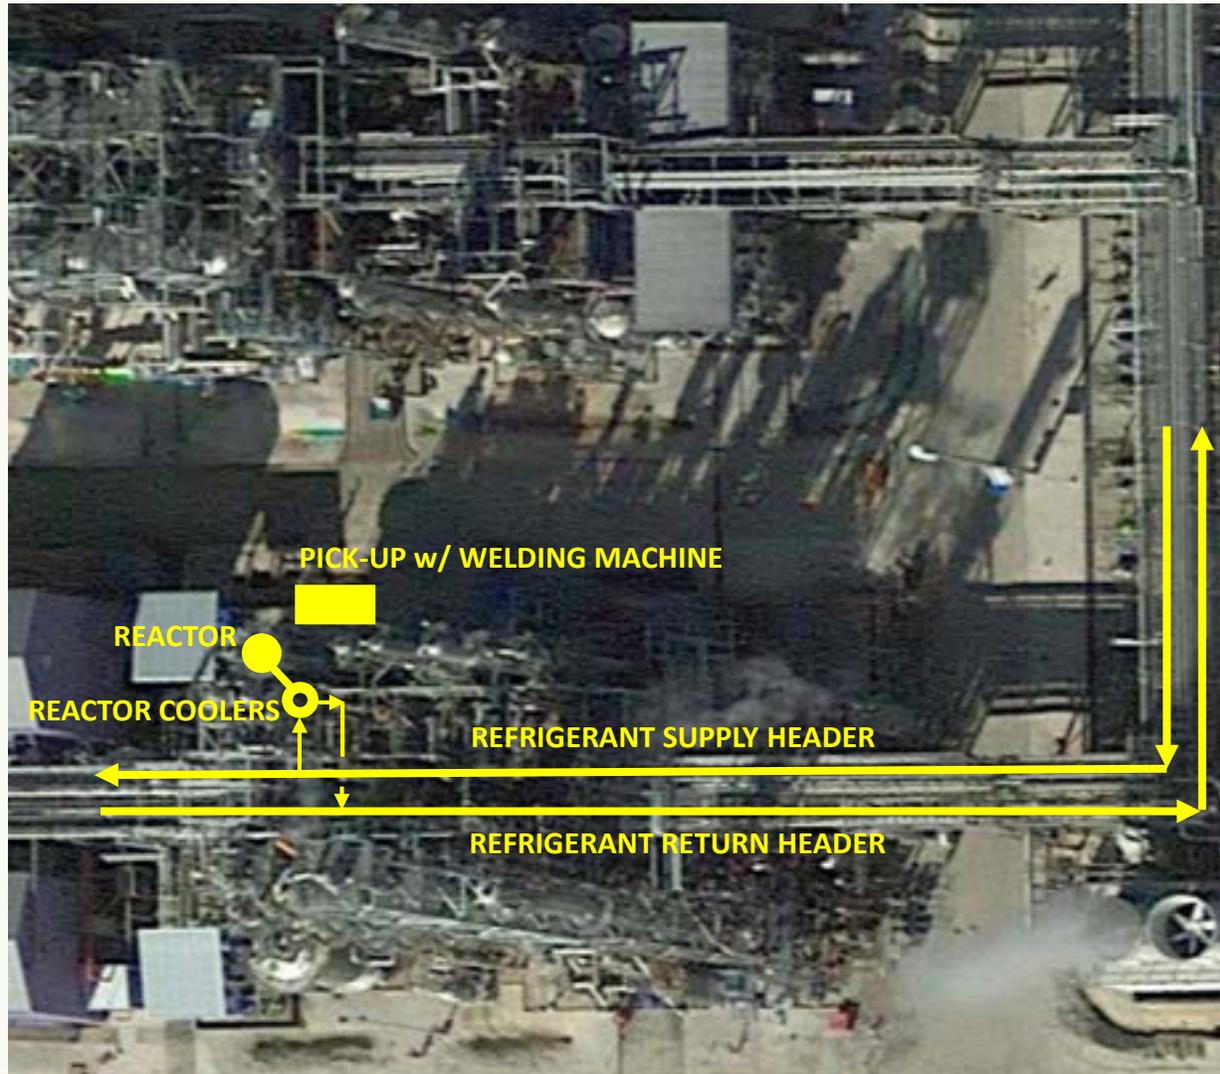

Reactor pressure rising.

**Saturday, May 19 10:28**

Reactor overpressures.

Reactor vapor ejected horizontally from relief valve.

Vapor ignited by welding machine – Fire Marshal.

## **Kuraray America EVAL Facility, Pasadena TX Fire, May 19, 2018**

**Initially a Flash Fire, flames propagated back to relief valve, becoming a Jet Fire.**

**Fire burned for almost three minutes, until relief valve closed.**

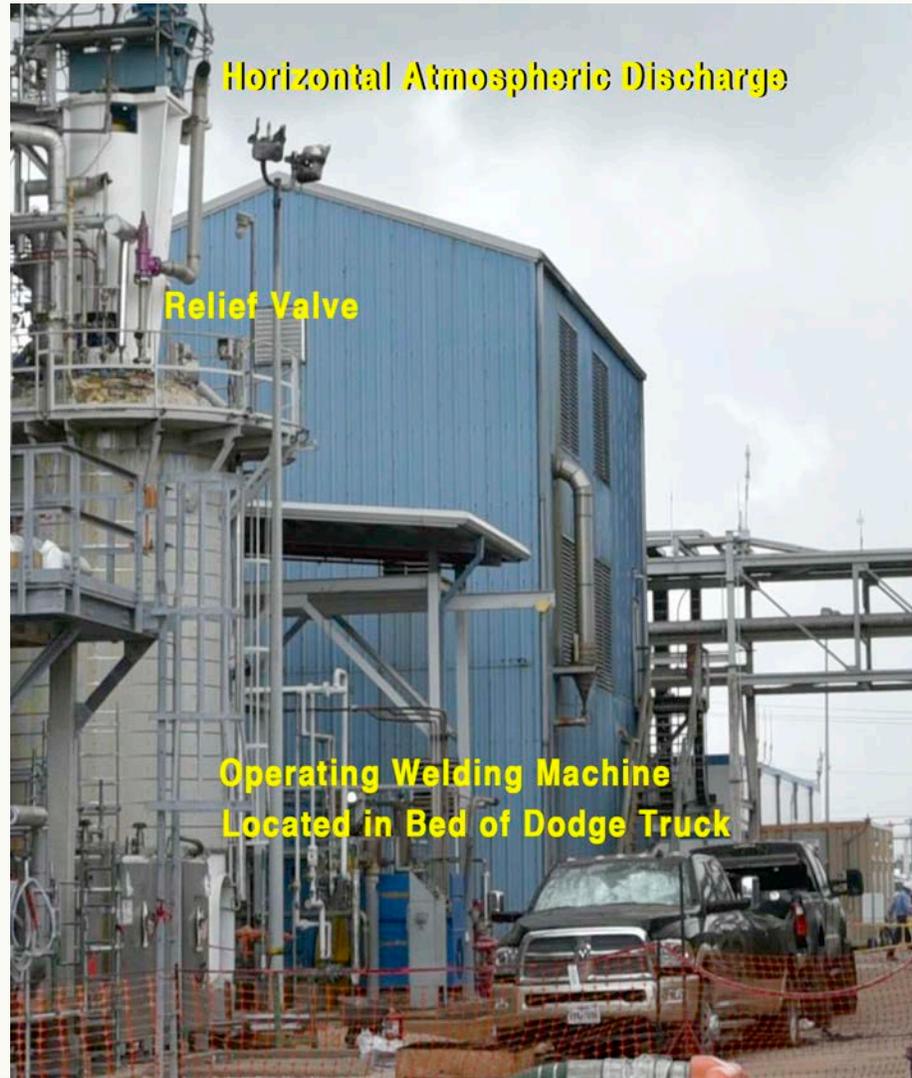

**Contract workers in the vicinity were performing activities including welding, insulating, and painting. They immediately evacuated when the fire erupted.**

**Workers suffered burns, or were injured by jumping from heights, or falling while running to escape the fire.**

**Twenty-one injured workers were transported to medical facilities for treatment.**

**One contract worker remained in critical condition for several days from life-threatening burns.**
