

**U.S. Chemical Safety and  
Hazard Investigation Board**

---

**BUDGET REQUEST**

**FY 2027**

## **Budget Request Summary**

The Chemical Safety and Hazard Investigation Board (CSB), as authorized by the Clean Air Act Amendments of 1990, became operational in 1998. It promotes chemical safety and accident prevention through investigating chemical accidents; making recommendations for accident prevention; conducting special studies; broadly disseminating its findings to industry and labor organizations; and informing stakeholder discussions on chemical safety and on actions taken by the Environmental Protection Agency, the Department of Labor, and other entities to implement Board recommendations.

The President's Budget proposes to eliminate funding for the Chemical Safety & Hazard Investigation Board (CSB) as part of the Administration's plans to streamline functions across government. The President's Budget proposes \$0 for the CSB's FY 2027 budget.
